Skills Summary

Programming and Web Development

- Created and designed a responsive portfolio website hosted in GitLab using HTML, CSS and Bootstrap
- Developed an E-Commerce API using Express and Node.js
 - Used databases and a querying language (NoSQL with MongoDB)
- Completed a Full-Stack Application using the MERN Stack
- Used Git for code sharing
- Deployed web application to cloud-based platforms (Render and Vercel)

Leadership

Trained new team members on operational protocols following the standard-operating procedures and mentored closely to improve performance for job regularization

Work Experience

GMA Network, Inc. – Quezon City, Philippines

Master Control and VTR Automations Engineer

January 2012 - October 2022

- Tasked to ensure smooth and uninterrupted sequence of on-air broadcast by careful verification of playlist entries and to perform critical recovery processes to quickly resolve on-air discrepancies
- Worked cross-functionally with clients across various departments and technical support groups for on-air playlist schedule accuracy
- Tested and calibrated machines and equipment daily to maintain quality standards
- At times, assigned to explore, study and test new equipment/systems (created a user guide and manual)
